

Slitter Rewinders

"MULTIWIND-II (S)" WITH DIGITAL FOUR-MOTOR SYNCHRONISED AC DRIVES

MULTIWIND-II(S)

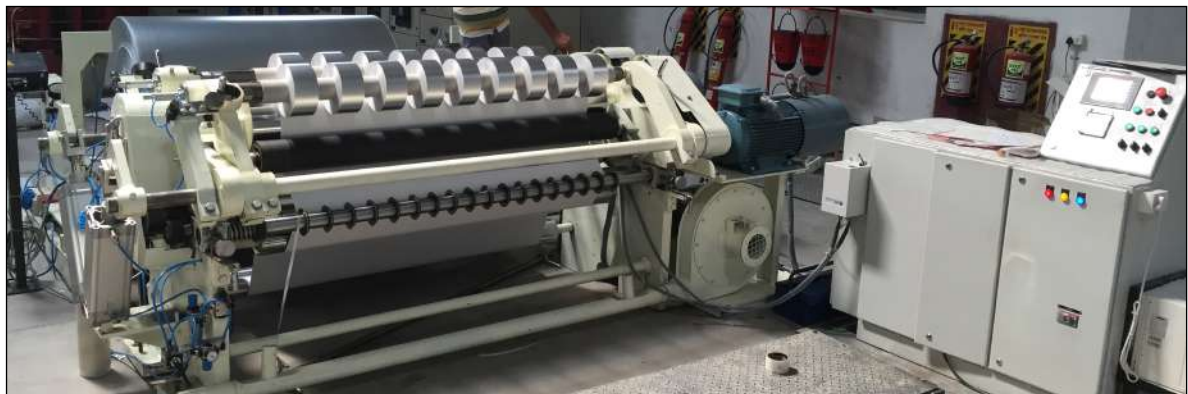

CENTRE-CUM-SURFACE REWIND

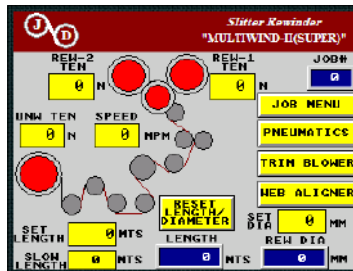

FLAWLESS SLIT REELS

This is a most versatile slitter, providing combination of Duplex Center-cum-Surface Rewind systems, suitable for all varieties of Papers, Films, Laminates, Aluminium Foil, Non-Woven Fabrics.

"Flawless slit rolls" are achieved due to a fixed minimum distance maintained between slitting and rewinding points. Two Rewind Shafts, carried on swinging arms, are Center driven through "Independent Coiler Motors" and have a surface counter balance system to adjust the pressure between the rewound reels and central drum. The Unwind Tension control is achieved through an "Independent Decoiler Motor" and Load Cell based Web Tension Feedback.

AUTOMATIC TENSION CONTROL SYSTEMS

TOUCH-SCREEN PLC CONTROLS

AIR SHAFTS

EXCLUSIVE/OPTIONAL FEATURES:

- Electronic Auto Unwind / rewind tension controls
- Digital Four Motor AC Drives
- PLC based single point access & control System
- Air Expansion Rewind / Unwind Shafts / Chucks
- Pneumatic Unwind reel loading system
- Pneumatic locking of Rewind Shafts
- Pneumatic Differential slip control
- Pneumatic pressure control of Rewind Shafts against surface roller
- Automatic web aligning systems
- Options of Scissor cut, Pneumatic Crush Cut & Razor Blade slitting

PNEUMATIC REEL LOADING SYSTEMS
